Achievement

Online Movie Tickets Booking System

Backend Developer:

In our project we have used Spring Boot Framework of core java for backend development. Our application allows admin can add the new movies, delete movies. User can view the movies list ,user can book the tickets and user can delete the tickets.

Designed UML diagrams based on given requirements..Used Spring boot to perform backend tasks. We used Spring data JPA for creation of entites in PostgreSQL. Done unit testing for all the possible use cases by postman tool.

Front Developer:

In our project we have used HTML, CSS, JS and Angular for front development. We can add new Movies to web page, and we can see all Movies in the home page. We used vscode and node.js to create the project.
